1/3

In 2023, CERT-In issued guidelines on information security practices for government entities

cyber threats have become a concern for the Indian government. To protect ICT against cyber threats, the Indian Computer Emergency Response Team (CERT-In), recently issued guidelines on Information Security practices for government entities in-line with the Government of India's objective to ensure that digital nagriks experience a safe and trusted internet. These guidelines serve the following purposes:

- Establish a prioritised baseline for cybersecurity measures and controls, within government organisations and their associated entities.
- Assist security teams to implement baseline, and essential controls and procedures to protect their infrastructure from

prominent threats.

- Act as a foundational document for administration and audit teams (internal, external/ third-party auditors).

In 2022, CERT-In issued guidelines for reporting cyber incidents in India

The rapid pace of India's digitalisation poses new security risks, as developments in emerging technologies is making an impact in various sectors. The multilayered digital ecosystem comprising infrastructure, technologies, applications, and devices is complex, and cybersecurity incidents are evolving at a breakneck pace.

Given this background, the Indian Computer Emergency Response Team (CERT-IN) issued a directive on 28 April 2022 mandating that all cybersecurity incidents need to be reported to CERT-IN within six hours from incident identification/notification. Going forward, this new directive will help organisations strengthen their cybersecurity posture.

The CERT-IN directive is all set to become a law from 27 June 2022. Thesenew directives, released jointly by MeitY and CERT-IN to augment, carry out analysis, and investigate cyber incidents, falls under Sub-section (6) of Section 70B of the Information Technology Act, 2000.
