About I4C

Indian Cyber Crime Coordination Centre (I4C) is constituted to provide a national platform for tackling cyber crimes in a coordinated and comprehensive manner.

I4C aims to strengthen the capabilities of Law Enforcement Agencies (LEAs) and improve coordination among various stakeholders and LEAs. It is continuously working for the enhancement of nation's technical capabilities to deal with cyber crimes and to further strengthen the operational architecture and coordination among LEAs and other stakeholders. I4C has seven components: TAU, NCRP, NCEMU, JCCT, NCFL, NCTC and NCR&IC.

The vision of I4C is '*to create an effective framework and ecosystem for prevention, detection, investigation and prosecution of cyber crimes'.*

COMPONENTS OF I4C

Overview

Comparative analysis of total cyber crime reported

The newsletter covers the fourth Quarter of 2021 & the first Quarter of 2022. It is supplemented by the I4C Newsletter 'Cyber Pravah' of Q2 & Q3 2021, so as to provide an overview and analysis of the cyber security incidents reported during the same Period.

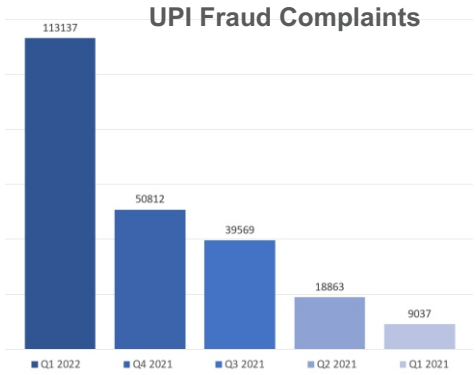

National Cyber Crime Reporting Portal saw a rise of 31% in reported complaints during the first Quarter of 2022 compared to the fourth quarter of 2021. Total of 2,06,153 complaints were reported during the first Quarter of 2022. Technological advancements and the COVID-19 pandemic have also accelerated the reliance on digital platforms to perform daily and essential activities, making users increasingly susceptible to cyber threats.

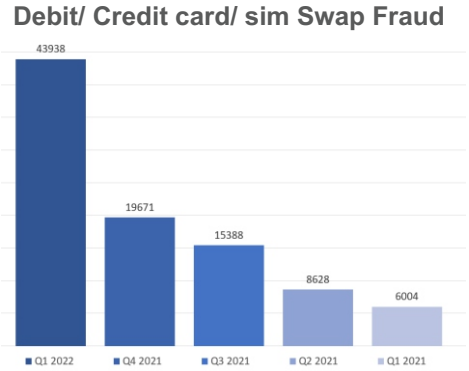

With the rise in total incidents reported, complaints under several cyber crime categories have also increased considerably. Notable changes include increase in UPI Fraud cases from 50,812 in Q4 2021 to 113137 in Q1 2022, and increase in Debit/Credit/Sim Swap Fraud complaints from 19671 in Q4 to 43938 in Q1 2022. Similarly, Internet Banking Fraud complaints saw a rise of 14% from 13,791 in Q4 to 34,229 in Q1 of 2022.

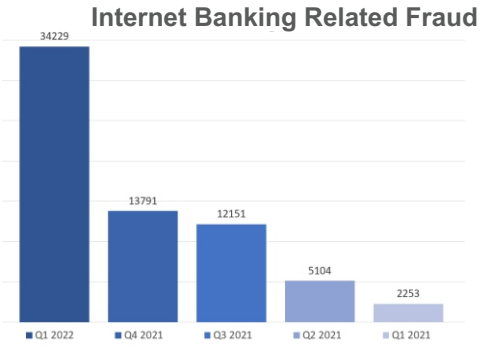

Cyber crime category (Online Financial Fraud) under the reporting portal is the most prevalent among others, as 66% of the total reported cyber crimes were Online Financial Frauds.

Threat Analytics Unit (TAU) of I4C has taken several steps in the field of Cyber Crime Prevention and Cyber Security Cooperation with Domestic and International Agencies through various meetings and dialogues.

All the components of I4C have made noteworthy progress in their respective fields, and the initiatives of I4C are continuing with equal zeal.

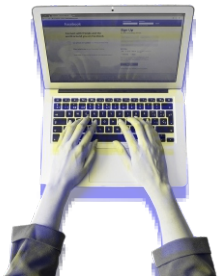

Key Statistics

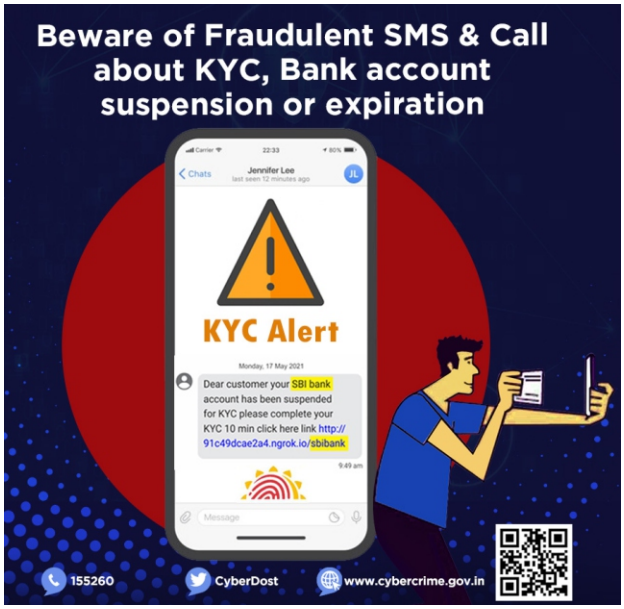

- 413 alerts shared with stakeholders on Open Source Information Sharing System (OSISS) platform.
- 15 Cyber Crime Information (Advisories) shared with State/ UT LEAs and concerned stake holders.
- An amount of Rs 42.5 crore was put on hold by banks under Citizen Financial Cyber Frauds Reporting & Management System (CFCFRMS).
- As on March 2022, more than 4,100 forensic services provided to LEAs by NCFL of I4C.
- As on March 2022, more than 12,600 Police Officers from States/UTs registered on the CyTrain Portal & 3,100 certificates have been issued for successful completion of training.
- Suspect repository consisting of over 3.5 lakh suspect profiles collated on the Portal.

- As on date, 1126 tweets shared via @Cyberdost, and the number of followers increased to 3.8 lakh.
- 26,891 complaints registered relating to Child Pornography/Rape Gang Rape (CP/RGR) (Anonymous) and 3292 complaints registered related to CP/RGR (Report & Track) from October 2021 to March 2022.
- 3,32,171 complaints registered relating to other crimes on the portal during the period.

National Cybercrime Reporting Portal (NCRP)

National Cyber Crime Reporting Portal is an initiative of the Government of India to facilitate victims/ complainants to report cyber crime incidents online. Complaints reported on this Portal are dealt by Law Enforcement Agencies.

Website : www.cybercrime.gov.in

This portal facilitates the citizens to the report all kinds of cyber crimes, including cyber crimes affecting women and children.

An acknowledgement number on the registered mobile number and email address is given to the citizen to track the complaint.

1930 (Earlier 155260)
Cyber Financial Frauds Helpline

The Citizen Financial Cyber Frauds Reporting and Management System was soft launched on April 01, 2021.

Helpline 1930 (earlier 155260) and its Reporting Platform (CFCFRMS) have been made operational by I4C with active support and cooperation from RBI, NPCI, Banks, Wallets and Merchants.

CFCFRMS has been developed in house by I4C to integrate Law Enforcement Agencies, Banks and other Financial Intermediaries in a single platform for effectively tackling cyber financial frauds. In the fourth Quarter of 2021 & the first Quarter of 2022, the module has saved the amount of Rs 42.52 crores of citizens' defrauded money.

Since, its launch in April 2021, this financial module (CFCFRMS) has saved more than Rs.60 crore till March 2022 with the help of LEAs, banks, wallets and other financial intermediaries. More than 80 financial intermediaries and State/UT LEAs are working round-the-clock to keep citizens' their hard-earned money safe and provide immediate response in cases of financial cyber frauds.

A quick complaint from the citizen's side on 1930 helps in prompt redressal of the complaint, minimizing the financial cyber frauds in the country.

CFCFRMS HAS SAVED

60 CRORE

TILL MARCH 2022

Step 1 Victim's call on Helpline No. 1930

Step 2 Police Operator submits the details

Step 3 Complaint is escalated to concerned Banks, etc.

Step 4 SMS sent to victim with ack. no. & further directions

Step 5 Bank marks the defrauded money on lien

Email: i4c.finmod@mha.gov.in

Key Steps Taken

- Search engines have been sensitized to issue warnings on keywords related to Child Sex Abuse Material (CSAM)
- Workshop-cum-Meeting on Challenges of Cyber Crime and Policy intervention with Ministries / Organisation / Departments held in December 2021.
- Analysis Reports on various modus operandi of cyber crimes shared with State/UT LEAs.

International Cooperation

- Participation in Counter Ransomware Initiative meeting for global protection against ransomware threat in October 2021.
- Virtual discussion on Comprehensive International Convention on countering the use of ICTs for criminal purposes in December 2021.
- 4th India-France Cyber Dialogue held in November 2021 regarding Cyber threat and Cyber Crime.

Awareness

CyberDost launched on Twitter, Facebook, Koo, Youtube, Instagram, Telegram, Public, Sharechat and LinkedIn for creating awareness on cyber crime among citizens.

DoT to apprise TSPs to send public awareness SMSs on Cyber Safety Tips.

Key Steps Taken

Capacity Building

- All Police Academies advised to design a course curriculum for capacity building for trainees in the field of cyber crime investigation and prevention.
- A monthly series of Technical workshops on Emerging & New Technologies used in cyber crimes started. The fifth online workshop of the series held in February 2022; total 05 workshops have been conducted.
- NCR&IC organised monthly webinar for LEAs on 25th Nov 2021 on the theme "Cyber Security Preparedness for Next 10 Years".
- BPR&D organised 02 weeks offline course on Cyber Crime Investigation and digital forensic at NCR&IC Lab, CDTI Nov-Dec 2021 for State LEAs.
- Webinars / Workshops conducted in October and November 2021 for operators of NCRP up to Police Station level.

Other Initiatives

I4C held Interactions and Organized Workshops with LEAs for JCCTs at Dehradun and Raipur in Q4 2021.

Grand finale of Manthan hackathon jointly organized by NCR&IC and AICTE took place in December 2021. More than 600 participated from across the nation.

An online quiz for LEAs was organised by NCR&IC in Nov 2021. More than 700 LEA personnel participated

Meetings with various stakeholders in relation to emerging methods of cyber crimes convened.

Important Events

1.1 Launch of I4C Newsletter "Cyber Pravaha"

The Union Home Secretary unveiled the first edition of I4C Newsletter "Cyber Pravaha".

The objective of the newsletter is to share the activities undertaken at I4C in the field of cyber crime prevention during April - September 2021. It also aspires to create awareness regarding the latest trends in cyber crimes, reported complaints on NCRP, recent International and National development in the field of cyber crime.

Union Home Secretary inaugurating I4C newsletter

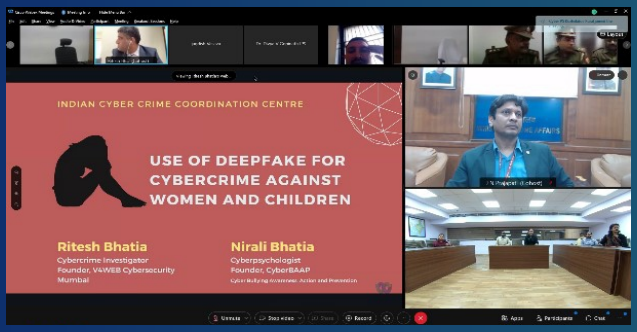

1.2 Technical Workshops for LEAs

For Law Enforcement Agencies of all States/UTs for effectively tackling Cyber Crime

4th Workshop
Use of Deepfake for cyber crimes
26th November 2021

5th Workshop
Investigating Banking Hacks
22th Februaly 2022

I4C organises monthly series of Technical workshops on Emerging Technologies used in the field of cyber crimes.

JS (CIS), MHA inaugurated the online workshops with brief introduction to the topic. Speakers made their presentations before law enforcement personnel from all over the country to increase their understanding on the subject, and help them effectively use the enhanced knowledge in further investigations of cyber crime cases. More than 500 Police Officers participated in the workshops.

1.3 JCCT Meeting-cum-Interaction

For Law Enforcement Agencies to effectively tackle Cyber Crimes

Meeting-cum-Interaction and Workshops on Joint Cyber Crime Coordination were organised at Raipur with Chhattisgarh Police. JCCT of I4C shared their experiences and challenges related to the field of cyber crimes.

International Cooperation

India-UK Joint Working Group
on Capacity Building
October 2021

Ad Hoc Committee on Cybercrime
To elaborate a comprehensive international convention to combat the use of ICTs for Criminal Purposes
February-March 2022

Counter-Ransomware Initiative Meeting
On ransomware challenges in the Contemporary Threat Environment
December 2021

4th India-France Cyber Dialogue
Hosted by MEA regarding Cyber threat and cyber crime
November 2021

SCO (Shanghai Cooperation Organisation) RATS
Practical Seminar On Securing Cyberspace in The Contemporary Threat Environment
December 2021

OEWG on Security in the use of ICTs
First Substantive Session of the OEWG on Security in the use of ICTs 2021-2025
December 2021

International Cyber Exercise
Workshop on " Ransomware attacks during the Pandemic" by NISC Japan
February 2022

India-UK Ransomware Resilience Exercise
Ransomware Workshop & Ransomware Scenario Exercise with NCSC UK
March 2022

Helpline No.
1930 (earlier 155260)

All **States/UTs, 63** banks,
13 Merchants and **08** Wallets
integrated into the CFCFRMS

UPI Based Frauds

Unified Payment Interface

In the First Quarter of the calender year 2022, UPI Fraud complaints reported by NCRP increased around six times in comparison to Q1 2021, as UPI is meant to facilitate the bank to bank payments using VPAs (Virtual Private Address), instances of frauds have grown manifold.

Various modus operandi utilized to perpetrate UPI frauds by cyber criminals;

Phishing Frauds

Email or text messages appear to be from well-known sources, such as UPI providers, banks, and e-wallet providers, requesting personal .

Vishing Frauds

Usually done over a phone call or through voice messages, such fake customer care numbers of UPI apps requesting information such as OTP or UPI Pin, on a pretext to solve an issue.

QR Code Scan fraud

Fraudsters defraud users by sending QR code to victims and asks victims to scan the QR code to receive money.

UPI ID Spoofing

Scammers create deceptive UPI handles by changing a few letters in UPI IDs of legitimate businesses with the aim of diverting money to themselves.

Collect Request Frauds

Fraudsters lure citizens with cashback or lottery wins, and convince them to accept collect request and enter the UPI PIN or scan QR code to receive money

UPI is a system that powers multiple bank accounts into a single mobile application, merging several banking features, seamless fund routing and merchant payments into one hood. It also caters to the “Peer to Peer” collect request which can be scheduled and paid as per requirement and convenience.

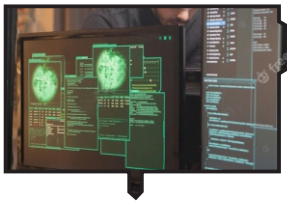

Dos & Don’ts

- Do not share account number, login ID, password, UPI-PIN, OTP, ATM PIN, Debit Card or Credit Card details with an including bank officials.
- Enter UPI PIN only to deduct money from your account. UPI PIN is not required for receiving money.
- Do not scan a QR code to receive money. In UPI, you only scan a QR code for making payments.
- Check the receiver’s name on verifying the UPI ID. Do not make payments without verification.
- Check URLs and domain names for spelling errors. Use trusted websites and apps for making digital transactions.
- If suspicious, report to local Police and at https://cybercrime.gov.in immediately.

Cyber Crime Terms

Click Fraud is an internet crime that occurs in pay-per-click online advertising when a person or computer program imitates a legitimate user clicking on an ad, for the purpose of generating a charge per click without having actual interest in the target of the ad's link.

Business Process Compromise attacks silently alter parts of specific business processes (e.g. account management, manufacturing, payment, and delivery), or machines facilitating these processes, in order to generate significant monetary profit for the attackers.

IP Spoofing is a method of hiding the original IP; by faking the header of a packet and the apparent source is not the real source. This hides the address of the sender, and can be used to execute a DoS attack on a third party.

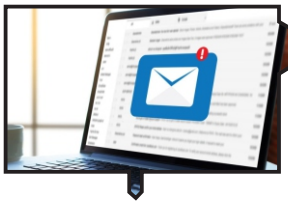

Zero-Day vulnerability is a vulnerability in a system or device that has been disclosed but is not yet patched. An exploit that attacks a zero-day vulnerability is called a zero-day exploit.

URL Shortening is a method of reducing the size and complexity of web URLs, mainly for ease of use. However, URL shortening also disguises a website's real domain name, and hinders detection of known malicious sites or destinations.

Tailgating is a method used by social engineers to gain access to a building or other protected area. A tailgater waits for an authorized user to open and pass through a secure entry and then follows right behind.

Honey Monkey is an automated program that imitates a human user to detect and identify websites, by crawling the World Wide Web, which exploit vulnerabilities on the internet. It is also known as a honey client.

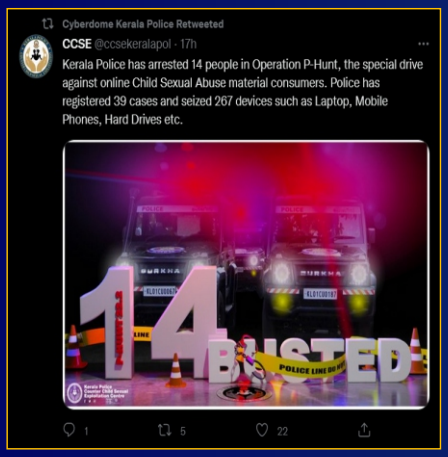

Least Privilege is the principle of allowing users or applications, the least amount of permissions necessary to perform their intended function. It's a cyber security best practice and it protects access to high-value data and assets.

Typosquatting is purchasing web domains that are similar to a well-known company website. When a person mis-types web addresses such websites appear. Typosquatting is usually done for fraudulent purposes.

Initiatives of States/UTs

Kerala Police Campaign against CSAM consumers

Cyber Crime Awareness created by Gujarat Police

Operation against Cybercriminals by UP Police

Rs 3.7 lakhs saved by UP Police

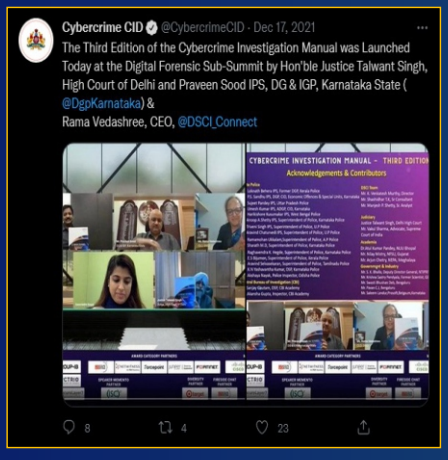

Awareness by Uttarakhand Police

Initiative of Telangana Police

Cyber Hygiene awareness created by Delhi Police

Cyber Crime investigation manual launched by Karnataka Police

Capacity Building by Himachal Pradesh Police

Cyber Hygiene

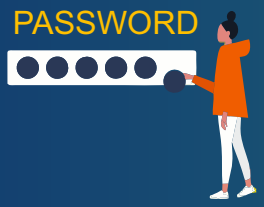

Be Careful of what you Download

Avoid unofficial App Stores or unknown websites.

Maintain System Health & Improve Online Security

Use Strong Passwords

At least 12 characters and Two-Factor Authentication (2FA) enabled

Keep your Firewall Turned On

To protect your computer from hackers

Create Backup of Data

Back up your data offsite and offline

Install or Update your Antivirus Software

To prevent devices from malware infections

Beware of unknown links

Do not open suspicious texts, pop-up windows, emails, attachments or click on unknown links

Install Antispyware Technology

For advanced detection and removal of spywares from the device

Control your privacy settings

On social media and other digital platforms and be aware of what you share online

Keep your Operating System up to Date

To protect your data from cyber criminals
