## Rising crypto scams targeting Trust wallet users

Trust Wallet, is a **non-custodial crypto wallet app** that allows users to store, send, receive, and manage cryptocurrencies across multiple blockchains while maintaining full control over their private keys. Trust wallet has over *5 Crore* android users globally.

I4C's National Cybercrime Threat Analytics Unit (NCTAU) has observed a significant rise in complaints on the National Cyber Crime Reporting Portal (NCRP) linked with cryptocurrency-related cyber frauds involving/targeting **Trust Wallet** impacting crypto users.

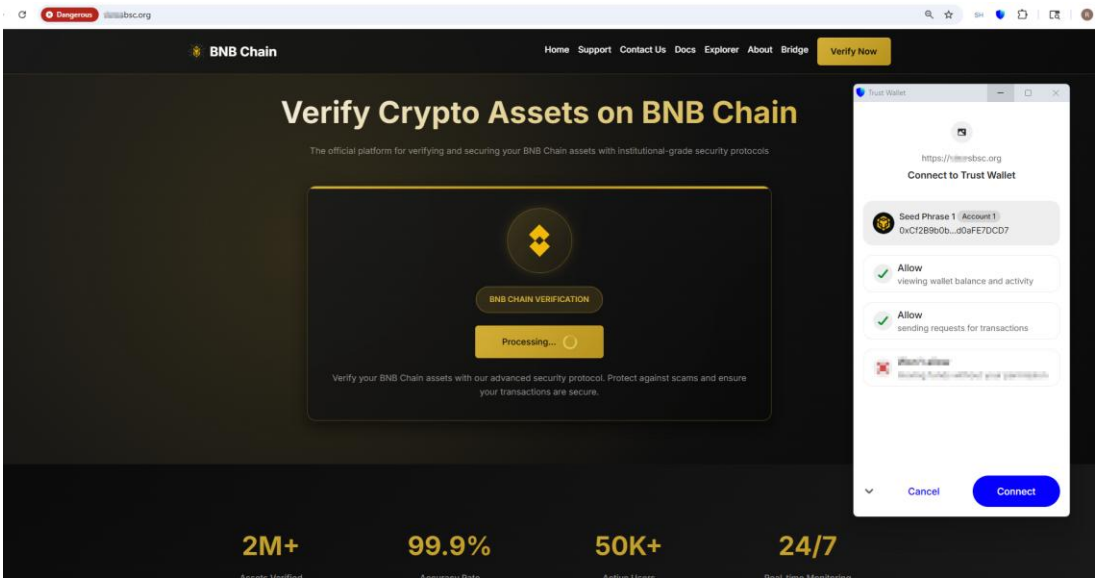

***Trust wallet Interface***

## MODUS OPERANDI

1. Scammers initiate contact via P2P platforms (e.g., Binance) and shift communication to WhatsApp/Telegram to avoid platform monitoring.
2. **Fake Crypto Verification**: Victims are falsely informed that "**crypto asset verification**" is required to complete the transaction.
3. **Authorization**: Users are redirected to impersonating websites / fake wallet verification pages (e.g. testwallet.site, beptest.org, bep20test.com) where victims are instructed to connect their Trust Wallet to these fraudulent sites.
4. **Mandate**: Malicious links prompts users to approve smart contract permissions, unknowingly granting full access to wallet assets.
5. **Wallet Drain** : Once permissions are granted, wallet drainer scripts automatically transfer funds without further user interaction / approval.

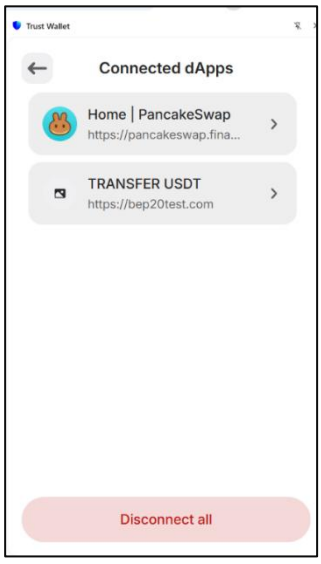

**Malicious Crypto Drainers Exploiting Wallet Permissions on fake website connecting to trust / meta mask wallet**

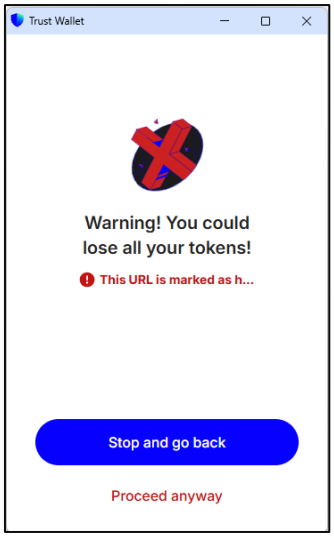

## POTENTIAL IMPACT

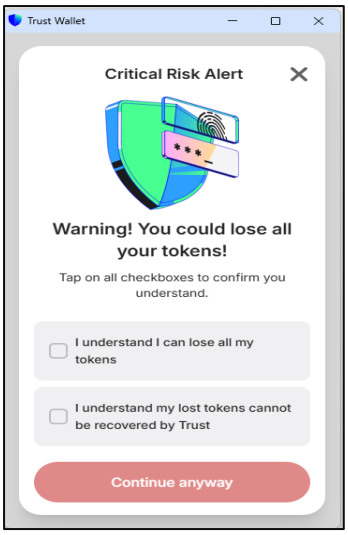

- **Direct Financial Loss:** Irreversible loss of crypto assets through unauthorized transfers. Transactions cannot be reversed due to lack of central authority.

## RECOMMENDATIONS

- **Disconnect dApps:** In case you are a victim to this modus operandi, remove all connected dApps from Trust Wallet settings to prevent unauthorized transactions.
- Beware of phishing and fake dApps (Decentralized Applications). Never share seed phrases and always verify receiver wallet address before any transactions.
- **Website Authenticity:** Always verify website authenticity before connecting your Trust Wallet.
- **Pay attention to Critical Risk Alert:** Critical risk alert warning message appears during attempts to connect Trust Wallet with suspicious websites.

- Report any cryptocurrency related cybercrime incidents on https://cybercrime.gov.in or call at 1930
